

Camp Themes

Habitat Week- Children will learn what a habitat is, what is needed in a habitat, and different animals and their habitats.

Earth Week- Children will learn about the things that make up the planet from rocks to weather to the beings that live here.

Recycle Week- Children will learn about litter, recycling, and the environment it affects, and things that they can do to help save the Earth. Reducing, reusing, and recycling will be three of main topics.

Animal and Plant Week- Children will learn about the plants and animals around them, the important roles they played in the past and the roles they play in the present.

Water Week- Children will learn all about water. They will learn the different qualities of water, importance of water, the role water plays in our daily lives, and the animals that call water home.

Smorgasbord Week- Children will learn a little bit about everything this week from geology to animals to water to trees.

Wild Week- During this week children will learn about the relationships between living organisms and their environment and their relationships between each other (example: between owls and mice).
